DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 2, 25 and 48 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is not known where in the specification there is disclosure for the claim limitation: "said wrapper instance is invocable by the application without further interaction with the framework" [emphasis added].

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 3 – 24, 26 – 47 and 49 – 69 are rejected under 35 U.S.C. 102(e) as being anticipated by Elgamal et al.

determining restrictions reads on the policy filter initialization module, element 112, (step 304 of figure 3) Applicants' steps of instantiating a wrapper class and encapsulating an implementation instance reads on the policy filters, elements 108 – 111 and Applicants' step of providing the wrapper instance reads on the service modules, step 305 of figure 3.

Regarding claims 3, 26 and 49:

Applicants' unrestricted implementation reads on Table 2 wherein all of the Value Pairs would be true.

Regarding claims 4, 27 and 50:

Regarding claims 5, 28 and 51:

Applicants' unrestricted implementation reads on the use of Elgamal et al's system within the U.S., wherein there are no restrictions on key size.

Regarding claims 7, 8, 30, 31, 53 and 54:

The language of Applicants' claims 7, 8, 30, 31, 53 and 54 reads on the discussion at column 5, lines 29 – 42.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Java™ Cryptography Extension (JCE) and Java™ Cryptography Extension 1.2.2 API Specification & Reference teach using Java™ programming language for Cryptographic restriction implementation. Olarig et al, Freeman, Fischer, Fieres et al, Klemba et al, Elander et al, Press, Le et al and Schell et al each teach various Cryptographic control for applications.
